Education

Computer Science Bachelors Degree

Western Governors University (ABET Certified) – April 2025

Certifications

CompTIA Security+

Valid: August 2026

CompTIA A+

Valid: August 2026

Experience

Dover Fueling Solutions, Huntsville, AL— Network Support Associate

October 2023 - Current

Provided advanced technical support for wireless products and collaborated with SaaS teams to ensure proper configuration of network firewall rules across national gas station networks.

Cumberland University, Lebanon, TN — IT Specialist

September 2022 – December 2022

Contributed to network configuration, security monitoring, and user support while balancing full-time studies and athletic commitments.

Projects

Java Backend

Developed a high-performance, multithreaded backend for an e-commerce platform using the Spring framework, integrating with a MySQL database to manage product data and order processing—designed and implemented RESTful APIs to enable seamless communication with an Angular frontend.

Machine Learning Application

Designed and implemented a machine learning model in Python using a multilinear regression model to accurately predict housing prices based on historical and demographic.

Full Stack Web App

Designing a full-stack web application with Next.js, MongoDB, and React for goal and schedule management, including user authentication and goaltracking features.

Cloud Infrastructure

Designed and managed on-premise cloud infrastructure with RAID backup, hosting family services such as VPN, cloud storage, and personal websites using Hypervisor.
